Emran Hossain

880-1886-324-116 | emrn.hossn@gmail.com | Portfolio

Summary

Senior Product Designer with 8+ years shipping high-impact B2B SaaS and AI products. I work across Product Design and Front-end Engineering with proven ability to lead full product cycles, design systems, performance optimization, and cross-functional collaboration resulting in significant business outcomes.

Education

University of Information Technologies and Sciences *Mar 2013 – Jun 2017*
Bachelor's of Science, Computer Science and Mathematics Dhaka, Bangladesh

Work Experience

Tiblo Digital *May 2024 – Present*
Product Design Lead Copenhagen, Denmark

- Took WheelLog from an early concept to a working fleet-management experience, grounding the first version in 20+ customer interviews and three sprints of prototyping. The work brought time to value forward by six weeks for a product serving 5K–10K operators.
- Built realistic fleet-telemetry prototypes with AI-assisted development, allowing the team to test three major features with remote users before committing to implementation.

The Total Office (Contract) *Apr 2023 – May 2024*
Product Design Lead Dubai, UAE

- Worked with the PM to review user-behavior data every two weeks, turning recurring friction points into a prioritized backlog of improvements for a platform serving 500K+ users. Shipped changes over two quarters to address churn.
- Built a token-based design system from scratch to make components more reusable and give engineers a more consistent foundation for implementation. Used AI-assisted prototyping to explore ideas quickly.

MarketTime LLC *May 2022 – Apr 2023*
Lead UI/UX Designer Austin, Texas, USA

- Reorganized a B2B order-management dashboard around task frequency and error severity, bringing high-frequency actions forward and reducing unnecessary cognitive load during order entry.
- Created a company-wide design system with 40+ reusable components, shared design tokens, interaction patterns, and implementation documentation to give design and engineering a consistent language.

Roxnor (Contract) *Feb 2022 – May 2022*
Lead Product Designer Dhaka, Bangladesh

- Cut a spatial-scanning workflow from 15 steps to 5 using ML-assisted suggestions, inline error recovery, and step-level cognitive-load reviews, while reducing inbound onboarding support tickets.
- Brought design and engineering closer together on a six-person team, reducing design-related PR review cycles from four rounds to one over three months.
- Designed a computer-vision-powered 3D scanning experience and an interactive in-app guide, refining both through three rounds of moderated testing with 24 users.

Genex Infosys PLC *May 2020 – Feb 2022*
Jr. Software Engineer Dhaka, Bangladesh

- Engineered a conversational AI platform for a government bank portal serving 1M+ monthly users. Built a multi-turn intent classification pipeline using Dialogflow CX and custom NLP fallback handlers, achieving 97% query resolution accuracy and reducing average resolution time by 60%, while supporting 50K concurrent sessions without latency degradation.
- Shaped the architecture and end-to-end user experience of an enterprise conversational AI platform for a major banking portal. Monthly customer interactions increased by 90% following deployment.

Projects

Writer GitHub *Jun 2025 – Present*
Creator & Maintainer

- An open-source Markdown Editor with LSP, built in Terminal, AI assisted writing, Kanban board and a Freeform canvas to enhance agentic or general development workflow.
- Optimized local markdown parsing and tokenization rendering to achieve sub-16ms frame times during heavy AI streaming sessions, dynamic tags to organize and maintain notes.

Slides GitHub *Oct 2026 – Present*
Creator & Maintainer

- Designed a slideshow experience with neovim's built in buffer creator, A custom parser for parsing Markdown headings into a center-aligned presentation layout with seamless, distraction-free rendering.

Skills

- **Product Design:** Figma, Origami, Prototyping, Design Systems, Information Architecture, User Research, Usability Testing, Product Strategy.
- **Design & Engineering:** Figma, Origami, TypeScript, JavaScript, HTML/CSS, React, Node.js, Python, Go.
- **Technologies:** React, Astro, Angular, SolidJS, Svelte, FastAPI, WebSockets, LangChain, OpenCV, MongoDB, gRPC, Docker, Async AI Streaming, Git, Linux, UNIX, CI/CD Pipelines, AI/ML Product Integration.
